\* Net improvement in subjects refers to the number of subjects students improved or worsened their grades in.

\*\* Homework grade is referred to as “Homework Work Ethic” by the Hillsboro School District and appears on the students’ reports cards.

\*\*\* The GPA Equivalent has been created by Bienestar for evaluation purposes. The school district uses four “letter grades” for academic evaluation.

A grade of “E” signifies the student is exceeding state standards, “M” signifies the student is meeting state standards, “NM” signifies nearly meeting standards, and “NY” signifies not yet meeting standards. Bienestar has created a GPA by using a 4.0 scale and assigning a point value for each letter grade. “E” = 4 pts., “M” = 3 pts., “NM” = 2 pts., “NY” = 1 pt. This system should not be equated with similar 4.0 scales based on a standard “A-F” grading system.

^ Student was out of school for over a month due to illness, and their homework and school grades suffered in response.

They didn’t attend Homework Club for almost two months.

^^ Student has special needs and receives modified report card with no letter grades
